

ELIJAH NATANIEL DE LOS SANTOS

FULL-STACK PRODUCT DEVELOPER

Davao City, Philippines | elaidelossantos05@gmail.com | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Full-stack product developer who ships production web and mobile platforms from architecture through launch. Since March 2026, I have led client delivery across automotive commerce, loyalty, B2B credit networks, and subscription retail - serving as the sole developer on the majority of engagements. Strong in React, Next.js, TypeScript, Supabase/PostgreSQL, Flutter, secure role-based workflows, integrations, and deployment.

PROFESSIONAL EXPERIENCE

Independent Client Work | Full-Stack Developer | Remote | Mar 2026 - Present

- Own end-to-end delivery for client products: discovery, data modeling, interface development, authentication, API integrations, deployment, maintenance, and direct stakeholder communication.
- Build responsive React/Next.js and TypeScript applications backed by Supabase/PostgreSQL, with role-based access, row-level security, transaction workflows, and production monitoring.
- Delivered EasyDrive, RewardMe, Loyalty/Medellin Rewards, Synergize, and Innerfire across customer, business, admin, financing, rewards, marketplace, and subscription-commerce journeys.

Department of Information and Communications Technology - Region 11 | Software Development Intern | 2025 | 3 months

- Built a Django Locator Slip system and a Flutter/Supabase fleet management application, translating operational processes into maintainable digital workflows.
- Collaborated with stakeholders on requirements, implementation, testing, and documentation for internal government tools.

Additional experience: Project Manager, Ateneo SAMAHAN (2025); Productions and Documentation Officer, Ateneo CSSEC (2022 - 2023); Virtual Assistant, Metropolitan (Jun - Dec 2021).

SELECTED PRODUCT WORK

EasyDrive Ecosystem | Next.js, React, TypeScript, Supabase - Connected vehicle discovery, financing acquisition, lead delivery, customer purchase, and dealer operations across production products.

RewardMe + Loyalty / Medellin Rewards | React, TypeScript, Supabase - Built member, business, and admin experiences with offer publishing, verified rewards, QR workflows, localization, and secure multi-role access.

Synergize Business Group | React, TypeScript, Supabase, PostgreSQL - Created an invite-only B2B credit network with a role-secured marketplace and auditable transaction ledger.

Innerfire Co. | Shopify, Subscription Commerce - Developed and supported the customer storefront, subscription purchase flows, merchandising, and production storefront operations.
